

Summary

Technical Trainer and Software Developer focused on Artificial Intelligence, Data Science, and Python-based software engineering. Experienced in delivering hands-on training in Python, Machine Learning, Deep Learning, and Generative AI while building AI-powered applications, backend services, REST APIs, and full-stack solutions. Combines technical training experience with an engineering mindset focused on practical problem solving, clean architecture, scalable systems, and production-oriented development.

Experience

Technical Trainer – Data Science & AI

2026 – Present

Data Valley, Vijayawada

- Deliver hands-on training in Python, Data Science, Machine Learning, Deep Learning, and Generative AI through practical implementations, projects, and real-world problem solving.
- Develop application-driven learning modules and practical exercises that translate AI concepts into working solutions and implementation workflows.

Software Development Intern

Jan – Apr 2025

StudyOwl Education Pvt. Ltd.

- Developed REST APIs, authentication modules, and backend services using Node.js, Express.js, and MongoDB.

Software Engineering Intern

May – Jun 2025

SmartBridge

Remote

- Built Python and Flask applications with REST APIs and automated backend workflows for web applications.

Machine Learning Intern

May – Jun 2024

Blackbucks

Remote

- Developed Python-based data preprocessing and data processing pipelines for machine learning applications.

Projects

VoltDrive – Interactive Automotive Experience

2026

React 19, Three.js, React Three Fiber, GSAP, Framer Motion

- Engineered a cinematic automotive web experience with interactive 3D vehicle visualization, responsive interfaces, animations, and performance-focused rendering.
- **Live:** voldrive-thenameisbhagavan.vercel.app — **GitHub:** github.com/thenameisbhagavan/voldrive

CareerOS – AI Career Intelligence Platform

2025 – Present

React.js, FastAPI, Python, MongoDB

- Engineered an AI-driven career platform combining ATS analysis, GitHub insights, skill-gap analysis, career recommendations, and interview workflows.
- **Live:** careeros-thenameisbhagavan.vercel.app — **GitHub:** github.com/thenameisbhagavan/CareerOS

VERITAS – Explainable Intelligence Platform

2026 – Present

React.js, FastAPI, Python

- Built an explainable intelligence pipeline for document analysis, claim extraction, evidence processing, credibility assessment, and transparent reasoning.
- **Live:** veritas-thenameisbhagavan.vercel.app — **GitHub:** github.com/thenameisbhagavan/VERITAS

AuraOS – Personal Intelligence OS

2026 – Present

React.js, FastAPI, Python, MongoDB

- Developed a browser-based personal AI system with authentication, knowledge management, document workflows, memory, and intelligent assistance.
- **Live:** aura-os-thenameisbhagavan.vercel.app — **GitHub:** github.com/thenameisbhagavan/AuraOS

Technical Skills

Programming: Python, JavaScript, SQL

AI & Data Science: Machine Learning, Deep Learning, NLP, Generative AI, RAG, Agentic AI

Backend & APIs: FastAPI, Flask, Node.js, Express.js, REST APIs

Frontend: React.js, HTML5, CSS3, Framer Motion

Databases: MongoDB, PostgreSQL, MySQL

Tools & Deployment: Git, GitHub, Postman, VS Code, Jupyter Notebook, Vercel, Render

Education

B.Tech in Artificial Intelligence and Data Science

2022 – 2026

Ramachandra College of Engineering, Eluru (JNTUK)

CGPA: 7.5/10

Achievements

- Delivered a one-week hands-on workshop on Generative AI and Prompt Engineering to 150+ students at PACE College of Engineering, Ongole.
